ACOMA'S

PT. Triputra Techno Med was established on DECEMBER 15th 2010
We focus mainly in sales, distribution and service of Radiology Equipment and Consumable such as X-Ray Films, Computed Radiography, Ultrasound, CT Scan and MRI.
Our customers are spread all over Indonesia, from Northern Sumatera to Papua.

VISION

Become the most trusted partner in Radiology

COMMITMENT

We dedicate ourselves to help hospitals, clinics, laboratories and the patients not only by supplying radiology & healthcare equipment and providing after sales service, but also by cooperating with our partners and financing companies to help customers in terms of funding and joint-operation-program.
Hence, we provide full service to our customers.

FAST - FOCUSED - FLEXIBLE

We dedicate ourselves to help hospitals, clinics, laboratories and our partners in fast, focused and flexible way so patients can be served optimally.
To apply this policy, we provide comprehensive product and service in radiology field to best suit user's need. By doing this, we believe that healthcare provider can focus to help the patient and society.

LOGIQ V2

Channel Partner
GE Healthcare

The brilliance of color. The simplicity of GE.

Now you can add the advanced capabilities of color Doppler to patient care with the compact LOGIQ™ V2 ultrasound system.

Easy to use color imaging in a portable ultrasound system

The compact LOGIQ V2 includes many advanced imaging technologies from decades of GE experience, including:

Coded Harmonic Imaging enables high resolution even at deep penetration.

Real Time Speckle Reduction Imaging (SRI-HD) reduces noise while enhancing true tissue detail.

CrossXBeam™ enhances your ability to visualize tissue interfaces and differentiate borders.

A system as versatile as your practice

The versatile LOGIQ V2 system accommodates a wide range of exams, including abdominal, obstetrics and gynecology, small parts, vascular, cardiac, pediatric and transcranial.

Push just a few buttons, enhance exam efficiency

With the LOGIQ V2, you get fast, accurate information with few keystrokes. For example:

SonoBiometry – Performs key fetal biometry measurements in seconds.

Auto IMT – Automates measurement of intima-media thickness for fast carotid exams.

Scan Assistant – Puts imaging protocols at your fingertips to reduce keystrokes by as much as 22 percent¹.

Auto Optimization – Optimizes B-Mode image to help improve contrast resolution.
